## TransMonEE indicators for measurement of development

The Transformative Monitoring for Enhanced Equity (TransMonEE) Database captures a vast range of data relevant to social and economic issues relevant to the situation and well-being of children, young people and women in countries of Central Eastern Europe and Commonwealth of Independent States (CEE/CIS).

The data represent a particularly useful tool for governments, civil society organizations, funding institutions and academia.

The TransMonEE database was initiated by the UNICEF in 1992, by collecting data for the previous three years. The database is updated every year in collaboration with National Statistical Offices (NSOs) in the countries of CEE/CIS.

The number of indicators is constantly increasing, so in the last few years the database has grown to more than 400 indicators.

The indicators are divided into 11 topics: Population, Marriage and Divorce, Fertility, Mortality, Health, Education, Child Protection, Crime, Social Protection, Child Well-being, Economy.

The database contains data on the following countries: Albania, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Czech Republic, Estonia, Republic of Macedonia, Georgia, Hungary, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Montenegro, Republic of Moldova, Poland, Romania, Russian Federation, Serbia, Slovakia, Slovenia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

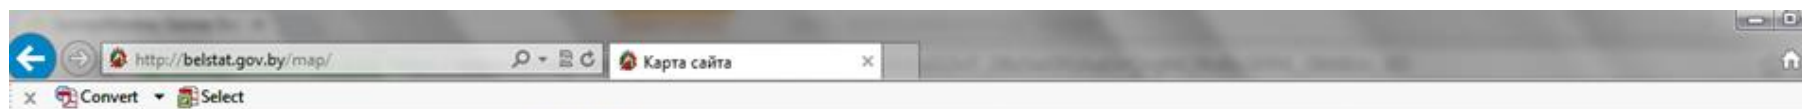

Access to the database is free of charge.

# Questions for working groups – 2

- What are innovation/good practices in dissemination and/or communication of social statistics in your countries that you want to share with a wider group?
- What suggestions do you have for the new TransMonEE website?
