

## Transformative Monitoring for Enhanced Equity for Children (TransMonEE)

**10th Meeting of European and Central Asian Statisticians.  
Parc Hotel Alvisse, Luxembourg, 10-11 November 2014**

### **Child Rights Monitoring Data on Equity: potential and challenges**

#### AGENDA

##### Objectives of the Meeting

Strengthened NSO collaboration and quality of national data on key indicators of child wellbeing. Reliable and comparable data accessible for users and decision makers in the Eastern Europe/Central Asia region and beyond through the TransMonEE (TM) database.

##### Expected Outcomes

Better understanding of the issues around the collection of reliable child focused data and improved compliance with TM reporting. In particular,

- Increased awareness of good practices and ongoing methodological work in terms of improved disability prevalence measurement;
- Increased awareness of the importance of dissemination and use of child focused data made available through TM.
- Contributions made to plans for the future direction and continuous improvement of the TM.
- Increased coherence and synergy between organizations working on statistics related to children operating at a regional level.

Note: Interpretation English-Russian will be available throughout the two day meeting.
