Data Hub – Enhancements to the TransMonEE Website

**page under construction*

Partnership – Improved Availability & Data Compilation

- Increased availability of data on certain sub-domains and indicators
- Improved data collection processes and coordination within countries

But there is a need to invest in:

- Harmonising methodologies and improving data quality
- Strengthening child protection information management systems

Partnership – Data improvement plans

Children in alternative care

- TJK – integrating actions into D4C Roadmap
- KAZ – developed plan in 2023 (under review)
- TKM – developing plan in 2024

Potential for discussion

- Holistic data on children/use of administrative data sources (TUR)
- Children with disabilities

Network – Supporting and strengthening the network

Virtual TransMonEE network meeting

Online webinars: ICVAC and measuring the share of public spending.

Quarterly updates.

TransMonEE analytical series:

- Pathways to better protection (2023)
- Violence against children (2024)

Next steps / Proposed actions

01

Continue and support the group of countries in the development and implementation of their **Data Improvement Plans on Children in Alternative Care.**

02

Welcome interests from countries to join a new group on **Indicator Systems to Measure Progress for Children.**

03

The focus of the next TransMonEE analytical series to be on **violence against children.**

THANK YOU

Data for Decisions on Children

**Status of Action points of the 2022
TransMonEE meeting as of Mar'24**

Guidance of the Conference of European Statisticians

Result: the TransMonEE meeting took note of the **CES Guidance**, appreciating this good collaboration between the Conference, its Task Force chaired by Canada, TransMonEE/UNICEF and UNECE.

The meeting reviewed three **country examples** in response to the CES guidance general issues for statistics on children

Actions:

- *Country delegations* will further review the Guidance and **discuss its implications** for the work of the NSOs, others NSS actors and **identify areas for support** from UNICEF and other actors. 
- *Countries* will discuss upon return and share their interest (with Canada Statistics, UNICEF and UNECE) in taking active part in **further steps following the adoption of the Guidance**, including the planning of the joint CES Expert Group-TransMonEE meeting in 2024. 

ECA Child Rights Monitoring Framework

Result: the **proposed framework** is endorsed for use for TransMonEE (with possible slight revisions) and is found relevant and useful at the national level

Actions:

- *UNICEF* will review and consider the suggestions made by the TransMonEE meeting to further refine the **indicator list and related documentation** and share the revised version with countries for review by end-2022.  **with delays**
- *Countries* will provide any **additional feedback** on the framework to UNICEF Regional Office by 31 March 2023. 
- *UNICEF* will conduct **data-gap analysis** in the region (for information) taking into account the latest list of indicators by the next TransMonEE meeting  and share with countries in advance. 

TransMonEE revisioning

Result: the TransMonEE meeting took note of the **revisions to TransMonEE** that took place since the last meetings in Vienna and Astana.

Actions:

- *UNICEF* will finish **harvesting/establishing automatic data linkages** with other data sources in line with the ECA CRM framework by Q2 2023 and share the results at the next meeting. 
- *UNICEF* will share the **revised TransMonEE website and dashboard** by early 2023 and seek the feedback of countries. 
- *Countries* will revisit all the **historic data for the continuing indicators** of the TransMonEE template and reach out to UNICEF for any clarifications or corrections by the Q2 2023. 

Update on data sources & landscape on children

Result: the TransMonEE meeting took note of the **endorsement of the ICVAC** by the UN Committee of Experts on International Classifications.

The meeting noted the **plans for the next round of MICS** as well as the experiences of Georgia and Ireland, with frequent (MICS+) and panel (Growing up in Ireland) surveys, respectively.

Actions:

- *UNICEF* will organize **training on the new classification** by Q3 2023 if/once it is adopted by the UN Statistical Commission next year. 
- *UNICEF* will organize a **MICS regional survey design workshop** for the next round by Q2 2023. 

Data on children in alternative care

Result: the TransMonEE meeting took note of the presentations on data quality and disaggregation, appreciated the examples of countries sharing the progress and challenges with alternative care data and discussed the follow up to the recommendations of the CES guidance on children in alternative care.

Actions:

- *UNICEF* will finish drafting the **analytical TransMonEE piece on children in alternative care** by the end of 2022 and share with countries for feedback.  **with delays**
- *UNICEF* will support a group of countries in 2023-2024 willing to develop/implement **data action plans** for improvement of data on children in alternative care. Four countries have already volunteered to take part in this initiative. 
- *Countries* will reach out to UNICEF for any **additional technical support** that may be useful to move the agenda at the national level. 
- UNICEF will update the **Statistical Manual on a Core Set of Child Protection Indicators** for the Region in 2023, which is informing the TransMonEE data collection.  **postponed and to be undertaken in line with progress towards the statistical classification of ICVAC and children in alternative care**
