About the Portal

The purpose of the Portal is to provide wide access to data on children for various categories.

Statistical publications

Existing databases containing children’s statistics

Development Goals of the Portal are:
1. To provide a disaggregated electronic database containing statistical indicators describing the situation of children in the main areas of society: demography, health care, education, justice and social protection, broken down by sex and other characteristics.
2. To ensure the possibility of monitoring data on the progress achieved by Belarus in achieving the Sustainable Development Goals related to children, based on the national list of indicators of the Sustainable Development Goals.
3. To promote better access to up-to-date official statistical information, administrative data and survey data to ensure monitoring of trends in core indicators on children, and dissemination of relevant information among government authorities that implement policies for the realization of children’s rights.
4. To increase public awareness, awareness and interest in the situation of children in the republic based on open and quality data.

The national platform was developed by Belstat with the support of the United Nations Children’s Fund (UNICEF).
